10 Reasons Why Education Is Important!

1. Opens up possibilities of more job opportunities with higher income which equals more financial security.
2. Teaches you how to handle responsibility.
3. Gives you the necessary tools to think for yourself and back up your arguments.
4. Exposes you to more of your peers, allowing you to see and experience diversity and different points of view.
5. Helps you to realize your potential, which empowers you to do more than you thought possible.
6. Gives you a better, more developed understanding of the world and current events.
7. Allows you to learn from the mistakes of those who came before you, so that you do not repeat the same mistakes.
8. Learn time management skills & organizational skills.
9. School teaches you that every action has a consequence.
10. Development of social skills for interaction with a wide variety of people.

"Education is not preparation for life; education is life itself."

John Dewey
How to Succeed in College

In the midst of everything that is going on in college, keeping an eye on the end goal is a good idea — Graduation. However, academic success comes in many forms. For most students, stellar grades are very important. For others, academic success also includes what is happening outside the classroom. The following can be helpful in guiding you toward a truly rewarding experience.

Take a broad range of classes in the beginning. It is a good idea to expose yourself to different subjects, fields and themes. Take some classes that are fun like art, photography or golf. You may discover the love of your life. Pay attention to areas that excite the passion in you.

Pick a career that suits you and you alone. Listen to others but form your own opinion. Make sure you are happy with your school. Once you have made some academic choices, make sure you are making the most, intellectually of the time you have left in college.

Don’t let minor errors in papers/grades take you away from your great ideas and goals. Be persistent!

Learning outside the classroom is also a critical part of your college experience. Join a club or organization that explores your interests and passions. Establish as many friendships as possible. Many people look back on their college years with very fond memories because of the friendships they have made.

Pay attention to finances and budgeting. Apply for financial aid. Look for work-study opportunities. The opportunities can range from jobs that are nominal but give you a chance to study while earning a paycheck to the college paying you to perform research with a professor or department. Work-study and internships can lead to future career jobs plus looking good on your resume.

Part of college life is learning to take care of yourself. Maintaining a healthy balanced life in school can be a challenge but is extremely important. Eating a well-balanced diet, exercise and getting enough sleep will help you stay healthy and academically successful. Lack of sleep will dull your concentration and hinder your ability to learn.

And remember to have FUN!
