

**Everett
Noise Administrator's Office**

March 29, 2016

Nicole Smith
Project Manager
Reese Construction Company
PO Box 1531
Marysville, WA 98270

Ms. Smith:

Your March 3, 2016 request for a temporary noise variance has been granted. This is to allow the Tulalip Water Pipeline Project Section 2 project to operate up to 48 continuous hours in mid-May for essential operations. Normal weekday construction hours are 7 am – 10 pm, 8 am – 6 pm on weekends and holidays. This variance will cover work at the intersection of East Marine View Drive and 19th Street. The projected dates for the 48 hour period are currently May 18-19, 2016.

The City requires the following mitigation efforts by Reese Construction:

- During the above-referenced 48 hour period, residents within a 500' radius of the site must be offered reasonable overnight lodging at a nearby hotel without personal expense. That offer must be available any time during the period. This does not need to include reimbursement for meals.
- Notification must be made in writing of the lodging offer no later than 14 days before the 48 hour work period begins, with a copy to the City of Everett Noise Administrator.
- Heavy equipment on the site must be equipped with either an ambient noise adjusting or broadband backup alarm to reduce the impact of backing alarms.
- Per Everett Municipal Code 20.08, the City of Everett requires that all residences within a 500' radius receive this notification. A list of those addresses is attached.
- This notification must include the noise complaint line for citizens to call if work is occurring outside of the approved hours (425-257-8775)
- Excepting the above-referenced 48 hour period, temporary construction is allowed 7:00 am – 10:00 pm on weekdays, 8:00 am – 6:00 pm on weekends and state holidays.

Sincerely,

A handwritten signature in blue ink that reads "Munro".

Megan Munro
Noise Control Administrator
425-257-8775
